

Minimally Stimulated Ketamine Infusion Therapy (MSKIT)

We subscribe to the best practice method of Minimally Stimulated Ketamine Infusion Therapy (MSKIT), which utilizes optimal dosing. This process is why our outcomes exceed those of other clinics in the region. An environment that minimizes stimulation will assist the brain in reaching a theta wave state that facilitates an ideal stimulation of brain-derived neurotrophic factor (BDNF) release, leading to neuro-optimization. Neuro-optimization is why Ketamine Infusion Therapy works.

rTMS Therapy

Repetitive Transcranial Magnetic Stimulation Therapy offers long-term relief for those suffering from depression and other mental health disorders. It is a simple, non-invasive, non-drug, therapy that does not require downtime. Patients can immediately return to their normal activities. We are one of the few clinics nationally to offer what is known as Stanford Accelerated Intelligent Neuromodulation Therapy or S.A.I.N.T. protocol. It is currently the most successful therapy for treatment resistant depression.

Here to provide better.

Better Starts Here

We are a locally-owned clinic that specializes in Ketamine Infusion and TMS Therapies to treat mood disorders and chronic pain. Since 2019, our mission has always been to help those struggling with treatment-resistant illnesses through brain optimization therapies. Our #1 goal is always remission of symptoms.

Our Mission

Our mission is to provide better individualized care, better treatment options, and better outcomes for our patients.

Conditions We Treat

- ✓ Depression
- ✓ Anxiety
- ✓ PTSD
- ✓ OCD
- ✓ Suicidal Ideation
- ✓ Chronic Pain
- ✓ Brain Fog

Our Vision

Our vision is to be the leader in pain management and mental health treatment in the Chattanooga area, creating a standard of care that results in the best possible outcome.

Better Individualized Care

Your comfort and health care needs are our utmost priority. We exclusively employ Certified Registered Nurse Anesthesiologists (CRNAs) to administer ketamine treatments to patients. Our patients feel safe and comfortable throughout the entire treatment process because of our experienced and compassionate team. We promise to put our patient's safety needs first, providing and delivering exceptional care from assessment, through treatment, and beyond stabilization.

Charles Miller
Owner / Provider

“ These guys are great! The treatments really helped me and will continue to help me in the future. Love this place! ”
